

New handles for pans

LUDABAK®

LUDABAK

The experts in plastic materials

Since 1988, we have been turning plastic granules and powders into the silent protagonists of everyday life: components for the electrical, mechanical, household appliance and home decor sectors that made the Ludabak name known all over the world. Our specialization in oven knobs and hobs allowed us to grow and set the basis for our vast know-how, thanks to which we are able to offer customized solutions for our clients, solutions designed to provide the best products for a variety of manufacturing needs.

From co-design to the choice of materials, we become part of our client's work team, providing support in making the best choices to maximize results in terms of quality, cost and timing. We are always looking for the best solutions to implement innovative ideas and bring beauty, practicality and the full quality of Made in Italy to millions of homes.

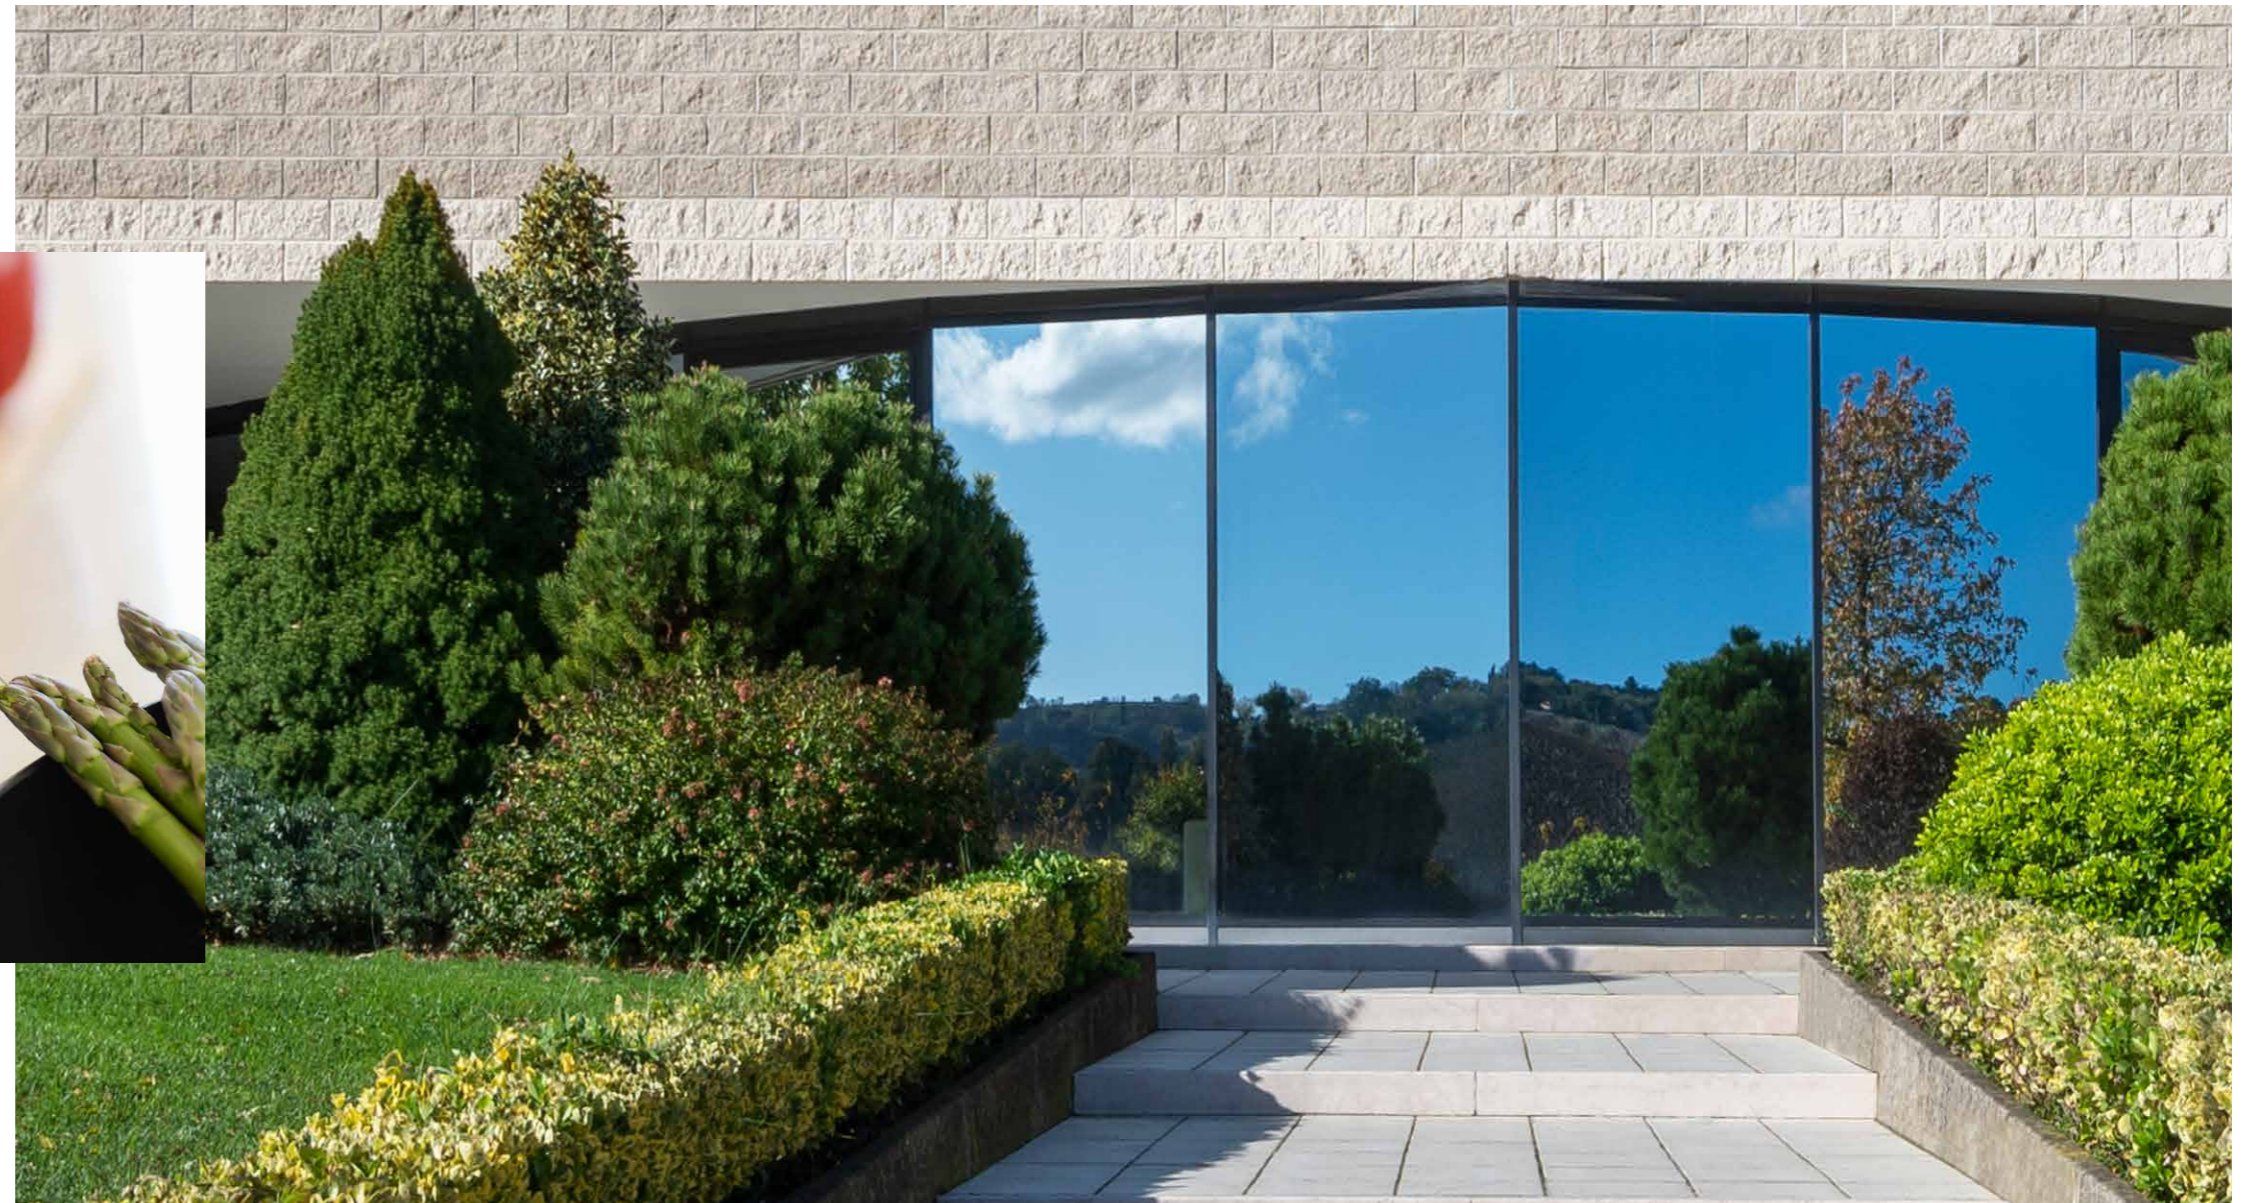

Ludabak across the globe

We look at the future with an export share of 45%

We export our components all over the world, from South America to Eastern Europe, from the Middle East to the Asian countries. It is thanks to our specialization in the production of knobs and handles that we are able to be highly competitive in our market and to supply clients also in emerging countries, a factor that led us to register our trademark worldwide.

Thanks to our background, today we can proudly say that Ludabak is synonym of knobs across the world and that in the household appliance sector our skills are undisputed.

WAVE

Soft and sinuous waves for surfing, waves with cold and sparkling crystalline foam: these are the concepts of our WAVE handle. Its shape gives the product a safe and ergonomic grip.

Code MC100

MAYA

Sinuous and voluptuous lines enclose the design of our MAYA handle. The rounded shape makes it safe and ergonomic.

Code MC101

SOFT

Softness, simplicity and essentiality are the peculiarities of our SOFT handle. Its rounded shape makes the product handy and safe.

Code MC102

JOY

Aromas of myrrh and precious spices, warm colors, radiant tones like sunlight. These characteristics give life to our JOY handle design. Ergonomics, maximum functionality, practicality for each use.

Code MC103

SLIM

Aromas of flowering meadows, natural and harmonious forms embody the concepts of our SLIM handle. Its particular silhouette characterizes its functionality in every use.

Code MC104

CUBIK

Technicism, rationality and geometries melting together to give rise to our CUBIK handle. A product with a strong technical impact, to experience the kitchen even in a professional way.

Code MC105
